

# OCS Certification

Operation Clean Sweep®, a global industry initiative of plastics to reduce possible leakage of microplastics, pellets, scales or resin in dust, to the environment, which advances depend on the commitment of everybody.

Show that you fulfill your commitment thanks to the OCS AENOR certification!

## What is OCS?

It is a voluntary program of the plastics industry designed to prevent pellets (*pellets or primary microplastics*) from going to the sea.

It is essential the commitment of everyone in companies, to avoid the loss of pellets.

## Who is it for?

It applies to any company involved in the production, transport, storage and transformation of plastic raw materials, regardless of where the center(s) of activity is located.

Preventing the leakage of pellets into the environment is everyone's business

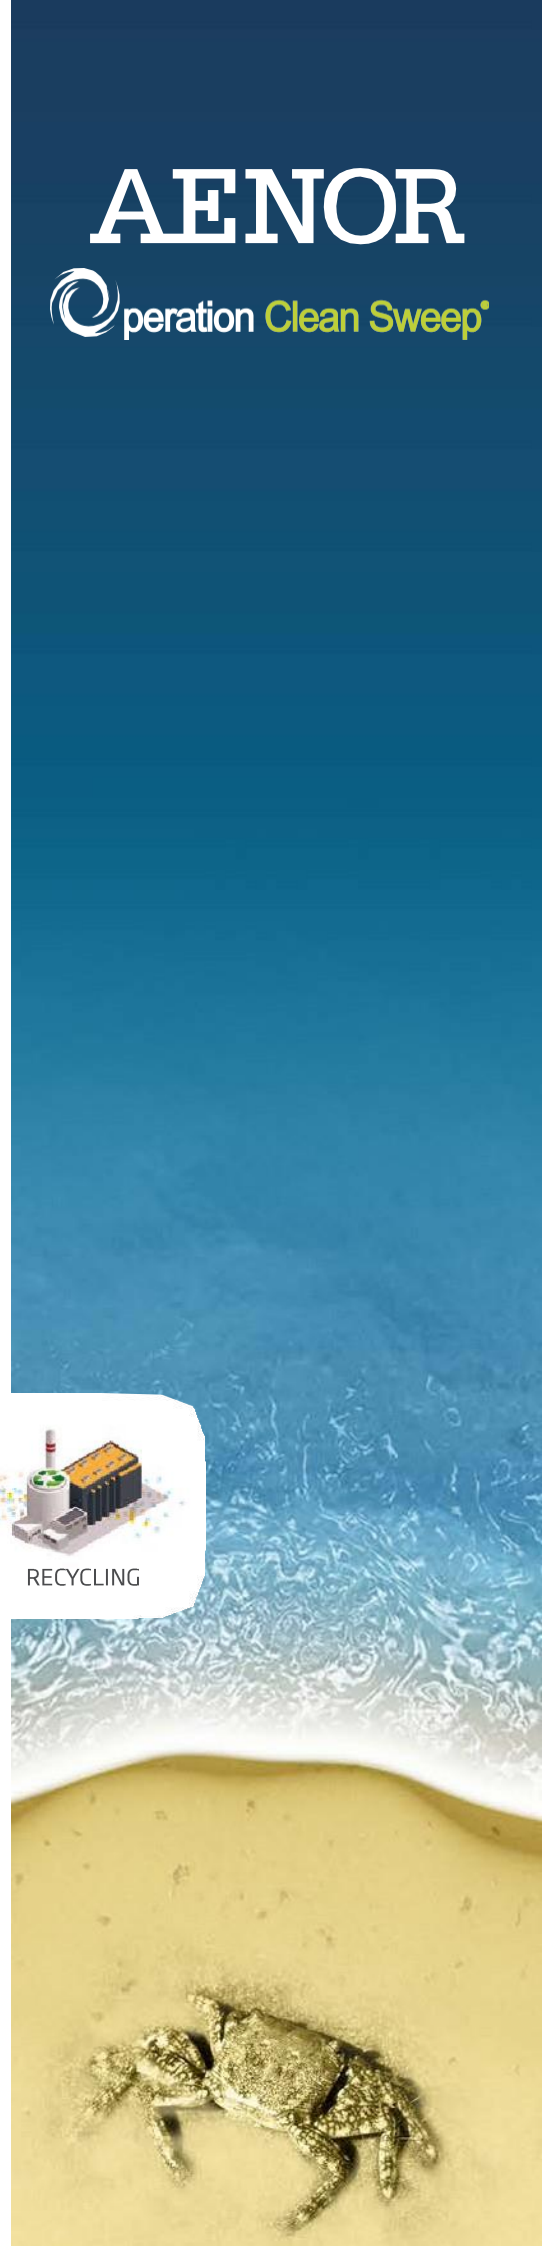

## How to join the OCS Program in Spain?

ANAIP is the owner of the OCS rights in Spain.

Requests the adhesion to the Operation Clean Sweep® by filling the form in ANAIP website:

<https://anaip.es/ocs/>

# Wherein is?

Operation Clean Sweep® (OCS) consists of promoting the use of good cleaning and pellet control practices in all operations in which plastic pellets are handled, to minimize leaks to the environment.

Among these practices, AENOR certifies the degree of compliance with 5 main measures:

- 1 Make the "zero pellet loss" a priority.
- 2 Evaluate the situation and the needs of your company.
- 3 Make the necessary improvements in the facilities and equipment.
- 4 Sensitize employees and create a sense of responsibility.
- 5 Track and enforce procedures.

## The guarantee of a committed global management

- Request detailed information on AENOR's certification process today.
- The application must be made by each production center where you want to apply for certification.
  - If you are certificate according to ISO 14001, the requirements of OCS herself easily integrate, on the basis of compliance with the volunteers agreements require.
  - If you are not certified according to ISO 14001, you can certify OCS.

## AENOR certifies your commitment

Once adhered to the OCS, AENOR certifies the degree of implementation of the OCS scheme in your company on a regular basis, in accordance with the principles of impartiality and independence, as well as the requirements of the reference regulation, thus demonstrating compliance with the measures to which you have committed.

AENOR is the certification body in charge of the planning, realization and management of the certification process, from the receipt of the certification application

until the completion of the process, which includes the issuance of the final evaluation report and corresponding certificate, as well as the subsequent maintenance of the certification.

## Proceeds

- Participate in voluntary industry initiatives.
- Reduce the impact on the aquatic environment.
- Improve the organization of workplaces in order to prevent and resolve leaks.
- Reduce material waste and maximize the use of raw material.
- Prevent slips and falls, and improving operational efficiency.
- Ensure compliance of local and national regulations on pellet control.
- Protect and augment the reputation of your company and the plastics industry.
- Be part of an international network of member companies; consult list in:
